Subject: Fw: Inquiry from ENR Subcommittee in prep for hearing this week.

Christine et al.:

See below for an incoming fracking-related request from OCIR. Sorry it took a few hours for me to send around.

I'm copying **Maria, Ron, and Ann** because this looks more like a drinking water/injection question than an OWM water disposal question.

Pamela -- one clarifying question: Do you have any intel to clarify whether "the water" that the Committee refers to means the fracking fluids being injected, the groundwater, or both?

Thanks,
Matt

Subject: Inquiry from ENR Subcommittee in prep for hearing this week.

ENR staff preparing for Natural Gas hearing on Tuesday (EPA not invited) have a couple of questions. Any chance you can turn this around before 2p.

ORD: Why has the Pavillion final report been delayed.

WATER: Does EPA have authority to sample the water prior to well injection? If not, would it make sense to give EPA that authority?

Pamela
